The following action is in response to the proposed amendment-after-final received March 9, 2006. The examiner has approved entry of the proposed amendment.

Allowable Subject Matter

Claim 30 is allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to show or render obvious a hydrodynamic torque converter as defined in claim 30, and particularly wherein the pump impeller wheel has an inner axial extension axially depending from the pump impeller wheel, the axial extension having an axial end defining cams enabling the rotation speed of the pump impeller wheel to be detected, and the cams are integrally formed on the axial end of the inner axial extension parallel to a rotation axis of the torque converter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3681

Response to Amendment

Amended claim 30 distinguishes over the prior art for the reason set forth above.

Accordingly, the previous rejections based on 35 USC 103(a) are withdrawn.
